

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Experienced and versatile iOS Engineer with over 8 years in software development, specializing in building robust, scalable, and testable mobile applications using Swift, SwiftUI, and UIKit. Adept in Agile methodologies, domain-driven design, and clean architecture. Passionate about crafting intuitive user experiences and contributing to high-performing cross-functional teams. Eager to apply my skills in Swift, Combine, async/await, AWS, and CI/CD pipelines to support Treatwell's mobile app innovation journey.

TECHNICAL SKILLS

- **Languages:** Swift, Objective-C, JavaScript, TypeScript, Kotlin, Java
- **Frameworks & Tools:** SwiftUI, UIKit, Combine, CoreData, Firebase, SPM, XCTest, XCUITest, Xcode Cloud, GitLab CI, Docker, Node.js
- **Architecture:** MVVM, VIPER, DDD, TDD, SOLID principles
- **Testing:** Unit Testing, UI Testing, Integration Testing, PACT contract testing
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), GCP, Firebase, CI/CD, Xcode Cloud, Docker
- **Databases:** PostgreSQL, MySQL, MongoDB, Realm, CoreData
- **Others:** RESTful APIs, Async/Await, Agile (Scrum, XP), Git, JIRA, Confluence

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and developed a suite of SwiftUI-based iOS applications with protocol-oriented programming principles to support financial and health-tech clients.
- Introduced Combine and async/await to refactor legacy code, significantly improving responsiveness, scalability, and testability across mobile modules.
- Led Swift Package Manager integration for internal modules, reducing external dependency complexity and improving modularization of core business logic.
- Collaborated with backend teams to define and integrate RESTful and GraphQL APIs, ensuring smooth bidirectional data flows and secure user interactions.
- Implemented end-to-end test coverage using XCTest, XCUITest, and snapshot testing to ensure regression-free production releases on Xcode Cloud.

- Mentored junior engineers and conducted technical workshops on Swift best practices, modern iOS patterns, and CI/CD automation using GitLab CI.
- Integrated Firebase services (Analytics, Remote Config, Crashlytics) to monitor performance, analyze usage patterns, and optimize app behavior.
- Participated in Agile rituals (Scrum, DDD workshops, retrospectives) to maintain a high-collaboration, high-delivery culture within the iOS team.
- Optimized app performance and energy usage using Instruments and Lighthouse, improving app store ratings and device battery impact by 20%.
- Delivered features with accessibility (WCAG) and internationalization compliance, expanding product reach across diverse geographies and user demographics.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed and maintained business-facing iOS apps using Swift and UIKit, ensuring pixel-perfect UI and alignment with evolving Apple HIG standards.
- Implemented asynchronous data-fetching and offline caching logic using URLSession, CoreData, and background tasks to support low-connectivity scenarios.
- Led the migration of critical modules from Objective-C to Swift, enhancing code readability, reusability, and overall team productivity.
- Integrated in-app analytics, push notifications, and remote configuration using Firebase SDK and ensured GDPR-compliant user data handling.
- Participated in regular sprint planning and reviews, and played an instrumental role in improving Agile estimation and delivery throughput by 25%.
- Designed reusable UI components using custom views and protocol-delegation patterns, reducing UI-related bugs and QA rework cycles.
- Wrote comprehensive integration and unit tests across services and view models, maintaining 90% code coverage in production-ready modules.
- Collaborated with UX/UI designers to test and refine SwiftUI prototypes and animations, iterating rapidly based on usability test feedback.
- Built and deployed mobile apps through automated pipelines with Fastlane and Xcode Cloud, reducing build errors and release time significantly.
- Contributed to documentation and knowledge bases, including onboarding manuals and feature decision logs, improving team efficiency.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed cross-platform mobile solutions with a primary focus on iOS, contributing to B2C and B2B applications across retail and logistics sectors.
- Engineered geolocation-aware features using MapKit and CoreLocation, enabling real-time delivery tracking and intelligent routing for drivers.
- Integrated RESTful APIs with secure token-based authentication (OAuth 2.0), managing user state and session integrity across app modules.
- Designed CoreData-based caching and sync systems to ensure seamless data persistence and offline availability across client apps.
- Participated in multiple code audits and refactoring sprints, aligning codebases with modular architecture and SOLID principles.

- Created CI jobs in Jenkins and GitLab for linting, testing, and deployments, streamlining collaboration with QA and DevOps teams.
- Worked closely with product owners to gather requirements, estimate delivery, and prioritize backlog items based on customer impact.
- Conducted workshops on test-driven development, reducing defect rates by advocating for tests-first engineering approaches.
- Proactively contributed to mobile app scalability planning and push notification strategies for user engagement and churn reduction.
- Delivered feature releases ahead of schedule while maintaining adherence to Apple's review guidelines and internal QA protocols.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Assisted in building modular Swift components and reusable UI views for retail-focused iOS applications under tight delivery timelines.
- Supported migration from legacy MVC to MVVM architecture, resulting in better unit testability and code comprehension.
- Integrated third-party SDKs for in-app messaging and analytics, enabling real-time customer engagement tracking.
- Participated in planning and code reviews with remote Agile teams, improving delivery velocity and transparency.
- Handled bug tracking and feature ticketing using JIRA and ensured resolution aligned with stakeholder expectations.
- Built automated snapshot tests for visual regression across iPhone/iPad targets and localizations.
- Created onboarding flows using custom navigation controllers to enhance user acquisition and reduce bounce rates.
- Maintained high-quality code with peer reviews and enforced use of Git branching strategies for feature delivery.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Contributed to an internal prototype iOS app as part of a research-based mobile team focused on urban mobility solutions.
 - Wrote Swift code for simple UIs, networking calls, and map-based services using MapKit and open APIs.
 - Collaborated with senior developers in bug fixing, small feature rollouts, and app submission preparation.
 - Learned fundamentals of Git, UIKit, Xcode, and Agile development while applying them in real-time projects.
 - Participated in internal demos and retrospectives, building communication and feedback skills in a tech environment.
 - Gained first exposure to writing unit tests using XCTest and mocking services for API response validation.
 - Assisted with maintaining project documentation and onboarding guides for future interns.
 - Supported product QA and contributed to the creation of exploratory test scripts for new feature validations.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ AWS Certified Developer – Associate
 - ❖ Google Associate Android/iOS Mobile Developer
 - ❖ Apple Certified iOS App Development with SwiftUI
 - ❖ Firebase for iOS – Advanced Crashlytics, Remote Config & Analytics
 - ❖ CI/CD Automation in iOS Development with GitLab & Xcode Cloud
-

PROJECTS

Treatwell Clone App (Personal Project)

- Built a prototype iOS app that simulates the Treatwell booking experience using SwiftUI, Combine, CoreData, and Firebase for analytics.
- Integrated a modular architecture with SPM, PACT-style consumer tests, and Xcode Cloud pipelines for builds, testing, and deployment.
- Designed UI and booking flow based on Apple HIG and WCAG compliance for accessibility and user experience alignment.

HealthTrackr

- Developed an iOS health and fitness tracker using SwiftUI and async/await to provide smooth real-time data syncing and insights visualization.
- Integrated with HealthKit and Firebase to gather activity metrics and push personalized goals and alerts to the user.
