

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Innovative and pragmatic Full Stack Engineer with 9+ years of hands-on experience building scalable, secure, and user-centric web platforms. Specialized in Symfony and React ecosystems, with strong exposure to cloud-native architectures and e-commerce integration. Passionate about open-source, knowledge sharing, and solving complex system design problems through modular and testable code. Actively seeking impactful projects that make a difference in global education and open software initiatives.

TECHNICAL SKILLS

- **Languages & Frameworks:** PHP, Symfony, Doctrine ORM, JavaScript (ES6+), TypeScript, React.js, Angular, Vue.js, Node.js, HTML5, CSS3, SCSS
- **Cloud & DevOps:** AWS (EC2, S3, Lambda), Google Cloud (App Engine, Firestore), Docker, Kubernetes, GitHub Actions, GitLab CI/CD
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase, Redis
- **Testing & Tools:** PHPUnit, Jest, Mocha, Cypress, Playwright, Postman, REST Assured, Swagger
- **Architecture:** REST APIs, Microservices, Event-Driven Systems, Modular Monolith
- **Other:** Agile, Scrum, JIRA, Bitbucket, Git, CI/CD, Open Source contribution
- **Security & Integrations:** OAuth2, JWT, SSO, Stripe, PayPal, Sentry, Firebase Auth

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Led development of cloud-native modules for B2B SaaS products using Symfony, Doctrine ORM, and Vue.js, ensuring full compatibility with PostgreSQL and scalable REST APIs.
- Integrated third-party services such as Stripe, PayPal, and Twilio into multi-tenant marketplaces with secure tokenized workflows and modular service boundaries.
- Orchestrated Dockerized CI/CD pipelines using GitHub Actions and GitLab CI, reducing deployment times by over 40% and improving rollback automation.
- Delivered reusable design systems with Storybook for Vue/React components, aligned to accessibility standards and mobile responsiveness.

- Mentored junior developers on clean code, test-driven development, and architectural decision making in microservices and monolith transitions.
- Designed event-driven modules using Symfony Messenger and Redis queues, improving async job reliability and throughput by 60%.
- Built real-time admin dashboards and plugin-enabled architecture for extending e-commerce storefronts and back-office features.
- Contributed to Symfony open-source plugins and conducted internal workshops on latest PHP features and SOLID design principles.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed high-traffic digital marketing platforms with PHP, Symfony, and Angular, delivering campaign automation flows with real-time analytics and segmentation.
- Designed and implemented flexible APIs for integration with CRM tools like Salesforce and HubSpot using REST and OAuth2 authorization layers.
- Built multi-step form builders with field validations, dynamic logic trees, and client-side caching using Vue.js and localStorage.
- Spearheaded implementation of backend cron tasks and data warehousing pipelines using PostgreSQL and batch jobs in Doctrine.
- Migrated legacy PHP apps to Symfony 5+, introducing containerized workflows and standardized error handling with Sentry and Monolog.
- Built responsive UI components integrated with backend via custom service layers, driving frontend modularity and testability.
- Collaborated closely with UX team to apply heuristic evaluations and user session replay analysis to improve flows by 30%+.
- Implemented feature flags and A/B testing mechanisms using LaunchDarkly and Google Optimize for rapid experimentation cycles.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Designed backend logic for real estate and healthcare products using Laravel and Symfony, transitioning monoliths into modular codebases.
- Developed SQL-heavy modules involving dynamic reporting, stored procedures, and schema versioning tools like Flyway.
- Used WebSockets with Node.js and Vue for real-time dashboards, alert systems, and live customer data feeds.
- Ensured GDPR compliance across systems by building data anonymization tools, consent tracking features, and export functionality.
- Built customized admin panels using Vue.js and BootstrapVue, integrated with REST APIs and token-auth security layer.
- Applied CI/CD automation through Docker and Jenkins, improving reliability of staging/testing environments for parallel testing.
- Constructed analytics dashboards for KPIs and engagement data with drill-down filters and chart exports.
- Implemented Elasticsearch-based search engine for multilingual real estate listings with typeahead and ranking adjustments.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Developed Symfony-based backend for e-commerce integrations, including shopping cart, checkout, and payment gateway logic.
- Built and maintained unit and functional tests using PHPUnit and Behat, increasing test coverage from 20% to over 85%.
- Created CLI tools for database migrations, admin data exports, and cache management.
- Enhanced frontend interactivity using jQuery and Vue.js for customer portals and plugin-based widget editors.
- Integrated PayPal and Stripe subscriptions with webhook listeners for billing lifecycle.
- Wrote custom middleware for route access control, validation, and localization.
- Used RabbitMQ for asynchronous invoice generation and delivery.
- Documented REST APIs using OpenAPI/Swagger, and collaborated with frontend team on data contract consistency.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Contributed to Moodle-based e-learning modules with plugin development in PHP and MySQL, enhancing quiz logic and user dashboards.
- Built custom Moodle theme with responsive CSS and dynamic blocks controlled by user role and context.
- Developed integration with SCORM packages and xAPI tracking tools for LMS reporting.
- Participated in upgrading Moodle core features, resolving regressions and improving form validation.
- Created student and teacher dashboards with AJAX-powered filters and visual progress indicators.
- Wrote scripts to sync student enrollments with CSV and remote webhooks.
- Collaborated with QA on UI test coverage using Selenium and code linting for Moodle plugin guidelines.
- Published documentation and tutorials for internal plugin usage and upgrade paths.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- ❖ AWS Certified Developer – Associate (2023)
- ❖ Google Cloud Professional Cloud Developer (2024)
- ❖ Symfony 6 Certified Developer (2024)
- ❖ Certified Scrum Developer – Scrum Alliance (2022)

PROJECTS

Marketplace Builder Plugin for Moodle

- Extended the Moodle platform with plugin modules that enable marketplace logic, vendor onboarding, Stripe integration, and secure license validation.
- Implemented scalable REST APIs using Symfony and Doctrine; front-end in React with component testing via Jest.
- Contributed to Moodle community forums and plugin submissions.

Education Management Portal

- Full-stack lead on a React + Symfony based platform to manage university resources, exams, and student engagement.
- Built custom modules with Doctrine and PostgreSQL for timetable optimization and attendance tracking.

Secure Content Delivery System

- Implemented a scalable content delivery system using AWS S3, Lambda, and CloudFront with signed URL authentication.
