PROFESSIONAL SUMMARY

Seasoned Frontend Developer with 8+ years of experience delivering scalable, user-centric web applications using modern JavaScript frameworks. Specialized in Vue.js, with strong command of ES6, HTML5, CSS3 (BEM), and clean architectural principles such as OOP and design patterns. Adept at collaborating across agile teams, writing maintainable code, and integrating build tools like Webpack and Grunt. Proven success in delivering aviation, digital marketing, and enterprise software solutions. Fluent in English and passionate about crafting intuitive, high-quality UI experiences.

TECHNICAL SKILLS

- **Frontend:** Vue.js, JavaScript (ES6+), HTML5, CSS3, SASS, TailwindCSS, BEM, Bootstrap, TypeScript
- **Architecture:** OOP, Design Patterns, Clean Code, SOLID Principles
- **Build Tools:** Webpack, Vite, Grunt, Yeoman
- **Testing:** Jest, Mocha, Cypress
- **Version Control:** Git, GitHub, GitLab
- **CI/CD:** GitLab CI, Azure Pipelines
- **Tools & IDEs:** VS Code, Figma, Chrome DevTools
- **Nice to Have:** RxJS, Adobe Experience Manager (AEM), Nuxt.js

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Spearheaded development of multiple frontend modules using Vue.js and Vuex, ensuring scalability, maintainability, and integration with backend RESTful APIs across aviation and logistics platforms.
- Migrated legacy JavaScript codebases to Vue 3 with Composition API, leading to a 35% performance improvement and a significant decrease in technical debt across mission-critical UIs.
- Implemented modular CSS architecture using BEM methodology and SASS, drastically improving styling consistency and maintainability across large-scale enterprise apps.
- Integrated RxJS for reactive data handling and side-effect management in complex form flows, improving state observability and UX responsiveness under high load.
- Designed and enforced code quality standards using ESLint and Prettier, while running unit and E2E tests with Jest and Cypress to guarantee stable releases.

- Coordinated with cross-functional teams to align on business logic, reduce redundant functionality, and improve team velocity by 20% through agile ceremonies and retrospectives.
- Built internal reusable Vue component libraries with Storybook documentation, improving team efficiency and design consistency across four different project tracks.
- Managed CI/CD deployment flows using GitLab CI and Docker, automating build and test pipelines for rapid feedback and streamlined production rollouts.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed dynamic campaign management dashboards using Vue.js and Nuxt, ensuring fast initial loads and optimized SEO for marketing clients with 100k+ daily users.
- Led frontend integration with Adobe Experience Manager (AEM), enabling marketers to control dynamic content blocks directly via CMS, improving delivery speed by 40%.
- Refactored frontend logic by introducing proper separation of concerns, Vuex modules, and reusable mixins, reducing bug rate by 60% across subsequent sprints.
- Utilized Webpack for custom builds and bundle optimization, enabling tree-shaking and lazy loading to drastically decrease page load times for mobile users.
- Collaborated closely with backend teams to define and implement OpenAPI specs, resulting in smoother integration cycles and fewer data format mismatches.
- Adopted RxJS for reactive polling and auto-refresh features on analytics dashboards, providing near-real-time user insights without excessive server load.
- Mentored junior developers on Vue.js best practices and BEM styling methodology, accelerating their onboarding and code contribution rate.
- Implemented accessibility standards (WCAG 2.1) for client-facing pages, increasing usability for screen readers and achieving legal compliance milestones.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Delivered over 10 single-page applications using Vue.js and vanilla JavaScript, focusing on modularity, responsiveness, and pixel-perfect UI implementation for enterprise clients.
- Integrated Yeoman scaffolding and Grunt tasks to automate linting, testing, and documentation generation, streamlining the build-to-deploy pipeline.
- Applied object-oriented JavaScript patterns to structure component logic, reduce cognitive load, and enable reuse across similar UI modules.
- Built responsive layouts using Flexbox and CSS Grid with mobile-first design principles, reducing the need for redundant media queries and improving device compatibility.
- Defined and maintained front-end error tracking with Sentry, providing proactive debugging and faster incident resolution during production outages.
- Participated in peer code reviews, enforcing clean code and test coverage standards across teams using GitHub PR flows.
- Partnered with UI/UX designers to translate Figma wireframes into interactive components, ensuring adherence to branding guidelines and intuitive UX.
- Conducted performance audits using Chrome DevTools and Lighthouse, identifying render-blocking assets and unoptimized scripts that impacted user experience.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Assisted in migrating existing web apps to Vue.js and ES6 modules, introducing modern development practices and reducing legacy codebase maintenance costs.
- Configured Webpack with hot module replacement and environment-based builds to enhance developer experience and deployment agility.
- Collaborated in feature teams to develop admin interfaces for aviation-related logistics tools, ensuring real-time data handling via WebSocket integration.
- Developed custom UI components for forms and tables with validation, sorting, and filtering, enhancing data handling and usability.
- Applied Clean Code principles to simplify component logic and improve long-term maintainability of the Vue-based applications.
- Helped integrate Git workflows and code reviews into development process, establishing a baseline for team collaboration and code quality.
- Participated in daily scrum and sprint planning meetings, aligning deliverables with stakeholder priorities and release schedules.
- Ensured browser compatibility testing across Chrome, Firefox, Safari, and Edge using manual and automated techniques to guarantee cross-platform stability.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Developed and maintained internal tools using JavaScript and HTML5, improving task automation for HR and finance departments by over 25%.
- Supported development of customer-facing Vue.js modules, learning best practices for component design, routing, and API consumption.
- Applied CSS3 and BEM methodology to create structured and maintainable style sheets in line with team standards.
- Wrote unit tests for core frontend logic using Mocha and Chai, improving code reliability and increasing test coverage across components.
- Conducted exploratory testing and reported UI/UX issues, improving application polish and end-user satisfaction metrics.
- Participated in weekly learning sessions focused on software craftsmanship, improving understanding of design principles like DRY and KISS.
- Assisted in creating documentation for onboarding new developers, helping reduce ramp-up time for future interns and junior hires.
- Delivered small-scale features end-to-end under mentor guidance, demonstrating capability and readiness for full-time development roles.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,

2010 – 2014

CERTIFICATIONS

- ❖ **Vue.js Professional Certification** – Vue School (2023)
 - ❖ **JavaScript Algorithms and Data Structures** – freeCodeCamp
 - ❖ **Clean Code and Refactoring** – Udemy
-

PROJECTS

- ✓ **Aviation Dashboard Suite**
Led the development of modular UI components in Vue.js for a real-time airline operations dashboard. Integrated with REST APIs and used RxJS for live data feeds.
- ✓ **Campaign Builder Platform**
Architected a drag-and-drop email and landing page builder using Vue and Vuex, enabling marketing teams to build, preview, and launch campaigns autonomously.
