

CRISTOFF STAN

Senior Software Engineer

Location: Tallinn, Harjumaa, Estonia | Email: cristoffstan@gmail.com
LinkedIn: <https://www.linkedin.com/in/cristoff-stan-b53490362/> | Phone Number: +372 58619311

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 9+ years of experience designing, developing, and maintaining **high-traffic CMS platforms, custom WordPress solutions, and enterprise SaaS applications**. Proven expertise in **PHP, React, WordPress, AWS, GCP, Docker, SQL, and NoSQL** with strong background in **component-driven architecture, cloud deployment, and system design**. Adept at refactoring legacy systems, improving scalability, and driving performance improvements while leading cross-functional teams. Passionate about clean code, CI/CD best practices, accessibility compliance, and building user-centric solutions.

TECHNICAL SKILLS

- **Languages & Frameworks:** PHP, React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind, Sass, Go
- **CMS & Tools:** WordPress (custom themes, plugins, VIP CLI), Timber, Twig, WP CLI, WooCommerce
- **Cloud & Infrastructure:** AWS (Lambda, CloudWatch, IAM, S3), GCP (Compute, Cloud Run), Docker, GitHub Actions, CI/CD pipelines
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch
- **Other Expertise:** Microservices, REST APIs, A/B testing, accessibility (WCAG 2.1), Agile/Scrum

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Designed and implemented **custom WordPress CMS platforms in PHP and React** powering multiple high-traffic enterprise websites, ensuring scalability and WCAG 2.1 compliance.
- Migrated and refactored **legacy PHP codebases** into modular architectures, improving performance, simplifying system design, and reducing deployment issues across environments.
- Built **component-driven UI systems in React and TypeScript**, enabling code reuse across projects and accelerating feature delivery with improved maintainability.
- Architected and integrated **RESTful APIs and GraphQL endpoints** to support large-scale WordPress deployments, boosting flexibility for internal and client-facing applications.
- Deployed applications on **AWS (ECS, Lambda, S3) and GCP (Cloud Run, Pub/Sub)** with Dockerized workflows, improving reliability, cost efficiency, and observability.

- Designed **SQL (MySQL, PostgreSQL) and NoSQL (MongoDB, Redis) schemas** for scalable data storage, enabling faster queries, caching, and real-time reporting.
- Implemented **GitHub Actions CI/CD pipelines** with automated testing, linting, and container deployments, reducing manual errors and accelerating release cycles.
- Collaborated with cross-functional teams in **Agile/Scrum** to deliver projects on tight deadlines while mentoring junior engineers and driving best practices.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed **custom WordPress themes and plugins** in PHP beyond out-of-box solutions, enabling marketing teams to manage campaigns at scale.
- Refactored **legacy monolithic systems into modular services** deployed with Docker, significantly improving performance and reducing downtime.
- Created **React-based UI components** integrated with WordPress backends, streamlining the user experience across multiple platforms.
- Managed **SQL and NoSQL databases** with optimized indexing, schema updates, and caching layers to support real-time analytics.
- Implemented **CI/CD workflows with Docker and GitHub Actions**, enabling reliable continuous deployments and automated QA testing pipelines.
- Optimized **WordPress VIP-level hosting environments** for speed, security, and scalability, ensuring compliance with enterprise standards.
- Collaborated with product owners and design teams to build **component-driven systems** for shared use across different customer platforms.
- Delivered **end-to-end cloud migration projects** to AWS and GCP, securing infrastructure, automating monitoring with CloudWatch, and reducing operational overhead.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Developed **WordPress multisite solutions in PHP**, enabling centralized content management across multiple high-traffic web properties.
- Designed **custom REST APIs** to connect CMS backends with third-party services including payment gateways, CRMs, and analytics platforms.
- Implemented **React and TypeScript components** for client dashboards, boosting interactivity and user engagement with responsive design.
- Containerized services using **Docker** and deployed scalable clusters in **AWS**, enabling high availability and fault tolerance.
- Optimized **SQL queries and schema designs** to improve database performance and reduce load times for large-scale reporting modules.
- Built **NoSQL caching layers with Redis and MongoDB**, improving data retrieval speeds and handling spikes in traffic effectively.
- Automated **unit and integration tests** with Jest and PHPUnit, ensuring software reliability and adherence to CI/CD practices.
- Engaged directly with clients to gather requirements, refine architecture, and deliver tailored solutions aligned with business objectives.

Software Developer
Decima Digital
November 2015 – April 2016
Tallinn, Estonia

- Designed and implemented **WordPress CMS modules in PHP**, enabling enterprise clients to manage custom workflows with minimal technical intervention.
- Created **front-end components in React and JavaScript ES6**, integrating seamlessly with WordPress backends and improving user experience.
- Assisted in **refactoring legacy PHP modules**, modernizing code for maintainability, scalability, and compliance with coding standards.
- Deployed services with **Docker containers** and configured pipelines for continuous delivery into AWS environments.
- Built and optimized **SQL and NoSQL database queries**, ensuring fast and reliable data retrieval under high traffic loads.
- Participated in **Agile team ceremonies**, contributing to sprint planning, code reviews, and cross-team collaboration.
- Enhanced **security practices** with proper IAM roles, CloudWatch monitoring, and vulnerability assessments across applications.
- Supported **multiple projects in parallel**, balancing independent contributions with collaborative problem solving.

Software Developer Intern
Borna Technology
September 2014 – August 2015
Tallinn, Estonia (On-Site)

- Developed **WordPress plugins and custom features in PHP**, enabling e-commerce clients to extend functionality beyond standard CMS options.
- Assisted in building **React components and JavaScript modules**, contributing to UI/UX improvements in client applications.
- Created **SQL queries and database schemas** to support small-scale projects and optimized them for performance.
- Deployed applications on **local Docker environments**, gaining early hands-on experience with containerized development.
- Documented **technical solutions, workflows, and integration guidelines**, ensuring knowledge transfer and smooth onboarding.
- Participated in **QA and bug fixing**, learning test-driven development principles and debugging practices.
- Supported **API integrations with external services**, ensuring smooth connectivity between applications and third-party tools.
- Collaborated with senior developers to improve coding standards, Git workflows, and team productivity.

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
 - Google Cloud Certified Professional Cloud Developer
 - Docker Certified Associate
-

PROJECTS

- **High-Traffic E-Commerce Platform:** Built scalable WordPress/React storefront with AWS-backed infrastructure handling thousands of daily transactions.
- **CMS Modernization Initiative:** Refactored monolithic PHP system into component-based WordPress architecture integrated with React UI library.
- **Cloud Migration Project:** Migrated legacy WordPress and API services to AWS and GCP with Docker and CI/CD pipelines for zero-downtime releases.
- **Analytics Dashboard:** Created real-time reporting system with SQL and NoSQL backends, React visualization components, and scalable API integrations.
- **Payment Integration Module:** Developed secure WordPress plugin supporting multiple gateways, with compliance to PCI-DSS and strong error handling.
