PROFESSIONAL SUMMARY

Full Stack Developer with 9+ years of professional experience building performant, scalable, and secure web applications. Adept in both frontend and backend technologies, including React.js, React Native, Node.js, GraphQL, PostgreSQL, DynamoDB, AWS, and serverless architecture. Passionate about transforming complex user needs into intuitive digital experiences—especially within mission-driven startups. Proven track record of leading and delivering high-impact features in agile environments, with a focus on healthcare, automation, and SaaS platforms.

TECHNICAL SKILLS

- **Frontend:** React.js, React Native, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, TailwindCSS
- **Backend:** Node.js, Express.js, Apollo Server, RESTful APIs, GraphQL, NestJS
- **Cloud & DevOps:** AWS (Lambda, S3, Cognito, API Gateway, SQS, CloudFormation), GCP, Docker, CI/CD pipelines (GitHub Actions, GitLab CI)
- **Databases:** PostgreSQL, MySQL, DynamoDB, MongoDB, Redis
- **Tools & Testing:** Git, Jest, Cypress, Mocha, Enzyme, Storybook, Webpack, Babel
- **Other:** Agile/Scrum, Jira, Figma, Linux, Serverless architecture, Microservices

WORK EXPERIENCE

Senior Software Engineer

Sensidev

September 2021 – December 2024

Timișoara, Romania (Remote)

- Built and maintained full-stack modules for a patient-centered telemedicine platform using React, React Native, and Node.js for web and mobile.
- Designed and implemented scalable GraphQL APIs using Apollo Server, integrated with PostgreSQL and DynamoDB depending on real-time or archival data use cases.
- Delivered a complete re-architecture of onboarding workflows, cutting patient registration time by 35% and reducing abandonment rate.
- Led a cross-functional team in the integration of third-party payments and appointment scheduling systems using AWS Lambda and Cognito.
- Developed pixel-perfect UI interfaces by working closely with designers and implementing custom reusable components in Storybook.
- Designed CI/CD pipelines with GitHub Actions and Docker, reducing deployment errors and improving release velocity.

- Owned the testing pipeline using Jest, Cypress, and Mocha, increasing automated test coverage from 48% to 85%.
- Mentored junior engineers and conducted weekly code reviews to ensure alignment with secure coding and design best practices.

Software Engineer

Syscom Digital

October 2019 – August 2021

Bucharest, Romania (Remote)

- Developed and maintained marketing automation tools using React and Node.js with PostgreSQL backend and Redis caching for performance optimization.
- Built robust integrations with external APIs and services (e.g., SMS, email, CRM) ensuring 99.9% uptime through retry queues using RabbitMQ and AWS SQS.
- Implemented multi-region deployments via CloudFormation scripts and dockerized services to scale automatically in GCP and AWS.
- Collaborated with cross-functional teams to deliver features like user analytics dashboards, campaign segmentation, and reporting modules.
- Developed internal CLI tools for service management, significantly reducing manual DevOps efforts.
- Enhanced frontend performance by 40% through code-splitting, lazy loading, and service worker optimizations.
- Led A/B testing integrations with segment-based rollout logic for targeted user journeys.
- Integrated GDPR compliance modules including cookie management, consent logging, and right-to-be-forgotten workflows.

Software Developer

Soft Build

June 2016 – July 2019

Timișoara, Romania (Remote)

- Created full-stack web applications in healthcare and logistics using React and Node.js, focusing on real-time tracking and form-intensive interfaces.
- Designed a complex inventory and order workflow platform with role-based access, notifications, and progressive web app features.
- Led the migration of legacy PHP backend to Node.js microservices using Docker and Kubernetes.
- Developed hybrid mobile apps in React Native for real-time tracking and push notifications synced with backend event queues.
- Refactored authentication and authorization logic to use JWT and AWS Cognito, improving security compliance and user experience.
- Worked on asynchronous task execution using message queues and batch jobs in a distributed system.
- Participated in architecture design sessions and sprint planning, acting as a bridge between design and engineering teams.
- Implemented dynamic form builders and custom schema validators for flexible data input modules.

Software Developer

Decima Digital

November 2015 – April 2016

Tallinn, Estonia

- Built internal CRM and case-tracking tools using JavaScript and MySQL with REST APIs for clinic data management.

- Collaborated with designers to implement responsive layouts and mobile-ready views across various browsers.
- Created cron jobs and background services for system sync and email alerts.

Software Developer Intern

Borna Technology

September 2014 – August 2015

Tallinn, Estonia (On-Site)

- Assisted in development of medical report automation tools, reducing manual input for health professionals.
 - Developed reporting dashboards using Chart.js and backend processing logic in PHP and SQL.
 - Participated in Agile stand-ups and learned collaborative Git workflows in live production.
-

EDUCATION

Tallinn University

Bachelor's Degree in Computer Science,
2010 – 2014

CERTIFICATIONS

- AWS Certified Developer – Associate
 - JavaScript Algorithms and Data Structures – freeCodeCamp
 - Node.js: Microservices – Udemy
 - TypeScript: The Complete Developer's Guide – Udemy
 - HIPAA Awareness for Developers – ComplianceJunction
-
