Professional Summary

Innovative and highly experienced Lead Software Engineer with over 10 years of full-stack development expertise and 5+ years of mentoring and team leadership. Proven track record building secure, scalable, cloud-native SaaS platforms in fast-paced environments. Expert in Microsoft stack (C#/.NET, Azure), Angular, and DevOps practices. Adept at fostering engineering excellence, driving delivery, and aligning architecture with business goals. Passionate about mentorship, technical growth, and delivering high-impact solutions.

Technical Skills

- ❖ **Languages & Frameworks:** C#, .NET Core, JavaScript, TypeScript, Angular, React, Python
- ❖ **Cloud & DevOps:** Azure (Functions, Service Bus, API Manager, Redis, Azure SQL), AWS, GCP, Docker, Kubernetes, Azure DevOps, GitHub Actions
- ❖ **Testing Tools:** NUnit, MSTest, xUnit, Playwright, Selenium, Postman
- ❖ **Databases:** SQL Server, PostgreSQL, MongoDB, Redis, CosmosDB
- ❖ **Other Tools:** Git, CI/CD pipelines, PDF Libraries (Aspose, iTextSharp, IronPDF), REST APIs, Microservices, Agile/Scrum

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- Spearheaded development of a SaaS compliance platform using C# .NET Core and Angular, reducing tax processing time by 40% through workflow automation and advanced validations.
- Acted as lead mentor for junior developers; conducted regular pairing sessions, architecture reviews, and introduced a "Tech Deep Dive" series to upskill the team in testing, cloud, and security.
- Integrated Azure Service Bus, Functions, and Redis to develop a scalable event-driven architecture for critical document workflows supporting over 1M transactions per month.
- Established CI/CD pipelines in Azure DevOps with automated testing, code scanning, and artifact deployments, achieving a 60% reduction in deployment errors.
- Oversaw implementation of secure document handling workflows, leveraging IronPDF and custom authorization middleware to meet regulatory compliance.
- Led migration of legacy monolith services to containerized microservices using Docker and Kubernetes, improving deployment times and environment parity.
- Delivered technical proofs-of-concept to evaluate integration of AI/ML-powered document parsing modules (Python-based) into existing C# workflow.
- Partnered closely with Product Manager and stakeholders to translate business goals into technical roadmap, ensuring on-time delivery across two quarterly releases.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- Developed and maintained client-facing tax reporting platform using .NET Core and Angular, processing over 500,000 K-1 documents annually.
- Designed a robust authentication/authorization system using JWT and Azure AD, enhancing security posture across all endpoints.
- Introduced integration testing and mocking strategies with NUnit and Moq, boosting test coverage by 70%.
- Played a pivotal role during seasonal peak load by optimizing SQL Server queries and caching via Redis, reducing report generation times by 50%.
- Mentored 3 junior developers and co-authored the team's code review checklist to maintain consistency and quality.
- Implemented complex PDF generation logic for custom financial forms using iTextSharp and conditional formatting rules.
- Built RESTful APIs for external client integrations, following OpenAPI standards and versioning for backward compatibility.
- Led the internal DevOps working group to pilot Dockerized deployments and introduce staged environments.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- Created internal dashboards and workflow engines for financial services clients using ASP.NET MVC and AngularJS.
- Maintained database integrity across distributed systems by implementing stored procedures, indexing strategies, and transactional boundaries in SQL Server.
- Coordinated Agile ceremonies and contributed to sprint planning, release estimation, and retrospective facilitation.
- Built interactive data visualizations and audit logs for compliance stakeholders, leveraging D3.js and custom middleware.
- Developed reusable UI components and frontend libraries to improve design consistency across modules.
- Created and deployed RESTful microservices to manage real-time investment feeds.
- Introduced centralized error handling and telemetry via Application Insights for all production services.
- Partnered with QA to create automated UI and E2E testing scripts with Selenium and Postman.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- Supported early-stage development of cloud-native developer tools on Azure platform, contributing to backend API enhancements in C#.
- Built internal diagnostics dashboard for engineering leadership to monitor service health and feature adoption metrics.

- Automated testing pipelines using Jenkins and NUnit, reducing regression-related downtime by 30%.
- Conducted code reviews and implemented performance profiling tools to optimize latency in developer workflows.
- Integrated Git for version control and trained junior interns on Git branching strategies for large-team collaboration.
- Attended weekly architecture meetings and contributed to RFCs for new service components.
- Participated in hackathons and innovation days; co-developed a plugin system that became part of internal toolchain.
- Documented internal tooling and authored onboarding guides adopted across engineering teams.

Projects

- ❖ **Digital Tax Workflow Optimizer** (SumatoSoft, 2024)
Built and deployed a dynamic K-1 workflow engine using .NET Core, Azure Functions, and IronPDF; reduced K-1 form generation time by 60% during peak season.
- ❖ **Event-Driven Wealth Management System** (Hexaview, 2021)
Led backend design of a Kafka-based portfolio alerting system that processed 5M+ events daily. Implemented rules engine for proactive client engagement and risk management.

Certifications

- Microsoft Certified: Azure Developer Associate
- AWS Certified Solutions Architect – Associate
- Google Cloud Associate Cloud Engineer
- Certified Scrum Developer (CSD)

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
