Professional Summary

Innovative and hands-on engineer with 9+ years of experience designing scalable UI systems and leading front-end development in Angular, SCSS, and component libraries. Proven expertise in creating accessible, modular interfaces and optimizing frontend performance across domains. Passionate about clean architecture, design systems, and modern tooling.

Technical Skills

- ❖ **Front-End:** Angular (v10+), TypeScript, RxJS, SCSS, Tailwind CSS, Material Design, Webpack, Storybook
- ❖ **Back-End:** Node.js, Express, PHP, REST APIs
- ❖ **Testing:** Cypress, Jest, Jasmine/Karma, Playwright
- ❖ **Tooling:** Angular CLI, NX, Git, CI/CD, Figma
- ❖ **Cloud:** AWS, GCP
- ❖ **Databases:** PostgreSQL, MongoDB, MySQL, Redis (SQL & NoSQL)
- ❖ **Practices:** Agile, Component-Driven Development, A11y, Lazy Loading, Change Detection Strategy

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- Designed and led the development of a centralized Angular component library, reducing code duplication across teams by 60% and improving release velocity.
- Architected SCSS-based theming structure supporting light/dark modes, brand customization, and high-contrast accessibility with WCAG 2.1 compliance.
- Directed change detection optimization across all critical modules, resulting in 35% boost in runtime performance and significant memory reduction.
- Collaborated closely with UI/UX designers to implement a modular design system integrated via Storybook for scalable documentation and usage.
- Championed migration from AngularJS to Angular 15+ and led team training to align on updated standards, tools, and testing methodology.
- Spearheaded lazy loading implementation across key route modules, decreasing bundle size by 47% and page load times by over 2 seconds.
- Conducted 100+ PR code reviews, mentoring mid-level and junior devs on performance, styling, and best practices in Angular architecture.
- Established front-end CI pipeline with testing coverage thresholds, accessibility audits, and lighthouse reports embedded in GitHub Actions.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- Developed responsive Angular interfaces for enterprise SaaS platforms, supporting 200k+ monthly active users with seamless UX on desktop and mobile.
- Led front-end implementation of micro-frontend architecture using Angular Elements to support plugin-based modular features across products.
- Integrated Tailwind CSS with Angular CLI to standardize design tokens and accelerate UI prototyping without sacrificing maintainability.
- Maintained and extended component libraries in Angular, ensuring compatibility across major releases and driving API-first design thinking.
- Built unit and e2e test coverage using Jest and Cypress, maintaining >90% coverage on production UI code and reducing regression rates.
- Collaborated with API/backend teams to define reusable models and optimize asynchronous data flows with RxJS and HTTP interceptors.
- Organized quarterly internal Angular workshops and hands-on mentoring sessions to accelerate onboarding and upskill teams.
- Drove accessibility compliance through semantic HTML practices, keyboard navigation support, and automated WCAG testing integrations.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- Created cross-browser compatible UI systems using Angular 6+, SCSS modules, and BEM conventions for a financial analytics dashboard.
- Implemented real-time charts and data visualizations using D3.js with Angular components, enhancing client decision-making workflows.
- Worked closely with QA and product to refine user flows and maintain pixel-perfect fidelity to Figma-based designs under tight deadlines.
- Developed internationalization-ready components with ngx-translate and custom locale resolution strategies.
- Built reusable layout modules using Angular flex-layout and grid systems, enabling full responsiveness across viewports and devices.
- Proactively refactored legacy jQuery/Bootstrap views into Angular modules, streamlining UI logic and reducing tech debt.
- Integrated RESTful APIs with authentication and error handling interceptors to support secure user sessions and efficient debugging.
- Participated in sprint planning, backlog grooming, and code demos, reinforcing agile culture and visibility across stakeholder teams.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- Contributed to internal Angular 2+ tooling for Microsoft Research teams to visualize experimentation data via interactive dashboards.

- Built SCSS mixins and utility classes that were later adopted into shared enterprise style guides across teams.
- Partnered with accessibility specialists to test and refine screen-reader support and keyboard interaction models.
- Wrote detailed developer documentation and created reusable component starter templates to assist new team members in onboarding.
- Supported Git version control workflows and worked under Agile processes with daily standups and weekly retrospectives.
- Collaborated with PMs and designers to iterate on UI mockups and functional requirements for new research interfaces.
- Built CI pipelines using Jenkins for deploying internal Angular builds to private preview environments.
- Helped resolve integration issues with REST APIs and assisted senior devs in refactoring service layer logic.

Projects

- ❖ **Component Library & Design System** — Built and maintained reusable Angular component library used across three internal SaaS platforms. Implemented Storybook integration, accessibility-first patterns, and custom theming.
- ❖ **Performance Optimization Suite** — Led initiative to implement Angular best practices (OnPush, memoization, lazy loading) across large enterprise dashboard, cutting load time by 40%.
- ❖ **A11y Testing Framework** — Developed automated accessibility test suite integrated into CI, using axe-core and Lighthouse, identifying WCAG 2.1 compliance issues pre-deployment.

Certifications

- **Google Professional Cloud Developer** — Google Cloud Platform
- **AWS Certified Developer – Associate** — Amazon Web Services
- **Advanced CSS & Sass** — Udemy
- **Responsive Web Design** — freeCodeCamp

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
