Professional Summary

Full-stack engineer with strong expertise in **Java, React, AWS, GCP, Docker, SQL, and NoSQL**, experienced in building scalable, secure, and high-performing enterprise applications. Skilled in designing microservices, cloud-native architectures, and modern UI frameworks, while ensuring continuous integration, deployment, and collaboration across cross-functional teams.

Technical Skills

- ❖ **Languages & Frameworks:** Java (Spring Boot, JPA, Hibernate), JavaScript/TypeScript, React 18+, Redux, Node.js
- ❖ **Cloud & DevOps:** AWS (EC2, Lambda, RDS, S3, CloudWatch), GCP (App Engine, BigQuery, Firestore), Docker, Kubernetes, Jenkins
- ❖ **Databases:** SQL (PostgreSQL, MySQL, Oracle), NoSQL (MongoDB, Redis, DynamoDB, Cassandra)
- ❖ **Other Tools:** Git, Jira, REST, GraphQL, WebSockets, CI/CD, Agile/Scrum

Professional Experience

SumatoSoft

Senior Software Engineer
Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Engineered scalable full-stack solutions using **Java Spring Boot and React 18+**, ensuring performance, fault-tolerance, and maintainability for enterprise clients across diverse industries.
- ❖ Collaborated with designers and backend engineers to deliver **pixel-perfect UIs in React** integrated with **RESTful and GraphQL APIs**, reducing time-to-market for client features.
- ❖ Led cloud migration from monolithic infrastructure to **AWS/GCP microservices**, deploying Dockerized workloads orchestrated with Kubernetes for high availability.
- ❖ Designed and optimized relational database schemas in **PostgreSQL** and **MySQL**, while implementing **MongoDB and Redis** for real-time caching and NoSQL use cases.
- ❖ Implemented secure authentication and authorization using **JWT, OAuth2, and SAML**, ensuring compliance with enterprise-grade security standards and reducing vulnerabilities.
- ❖ Automated CI/CD pipelines with **Jenkins and GitHub Actions**, drastically reducing release cycles and improving deployment reliability across staging and production.
- ❖ Mentored junior developers in **Java, React, and cloud practices**, while conducting peer code reviews and introducing industry best practices in testing and design.
- ❖ Partnered with stakeholders to align architecture decisions with business strategy, ensuring scalability and cost-effectiveness in cloud deployments.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Built enterprise-grade web applications with **Java Spring Boot backends and React UIs**, enabling end-to-end functionality with reusable modular components.
- ❖ Implemented **RESTful APIs and GraphQL endpoints** to integrate third-party systems, reducing manual dependencies and enabling data interoperability across platforms.
- ❖ Designed **data pipelines in AWS (Lambda, S3, DynamoDB) and GCP (BigQuery, Firestore)** to support analytics, reporting, and real-time event processing.
- ❖ Architected and deployed **containerized services using Docker and Kubernetes**, enhancing horizontal scalability and enabling zero-downtime rolling updates.
- ❖ Conducted **SQL query optimization** and database tuning for PostgreSQL and Oracle, while adopting **NoSQL MongoDB clusters** for high-volume document storage.
- ❖ Developed **unit and integration tests with JUnit, Mockito, Jest, and Cypress**, ensuring quality assurance and coverage in both backend and frontend layers.
- ❖ Collaborated with product managers and clients, delivering software aligned with agile sprints, ensuring on-time delivery and customer satisfaction.
- ❖ Enhanced observability by integrating **ELK stack and CloudWatch logging**, allowing early detection of performance bottlenecks and improving incident response.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Delivered **Java Spring-based web applications** with React frontends, contributing to agile teams focused on enterprise systems and B2B SaaS platforms.
- ❖ Implemented **GraphQL APIs and WebSocket services** to support real-time communication features, including notifications and live data dashboards.
- ❖ Optimized application performance by fine-tuning SQL queries and leveraging **Redis caching layers**, significantly reducing database load.
- ❖ Built CI/CD pipelines with Jenkins and automated test suites, improving reliability of releases and minimizing post-deployment defects.
- ❖ Participated in full-cycle software development including requirements gathering, system design, coding, testing, and deployment.
- ❖ Designed intuitive user interfaces with **React, Redux Toolkit, and TypeScript**, improving usability and adoption among client users.
- ❖ Integrated **payment gateways and secure transaction systems** with strong encryption standards and PCI compliance for fintech clients.
- ❖ Collaborated with senior engineers on **cloud migration projects to AWS and GCP**, modernizing legacy systems into scalable, cloud-native architectures.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Contributed to the development of internal tools with **Java and React**, focusing on UI enhancements, testing automation, and feature integrations.

- ❖ Assisted in migrating legacy applications to **cloud-based infrastructure** using early AWS services and CI/CD practices.
- ❖ Built interactive dashboards in React, integrating with APIs to visualize KPIs and business metrics.
- ❖ Enhanced database modules by writing efficient SQL queries and preparing reports for management stakeholders.
- ❖ Designed UI components aligned with Microsoft design guidelines to ensure accessibility and scalability.
- ❖ Automated testing processes with Selenium and JUnit, improving regression testing efficiency.
- ❖ Collaborated in daily stand-ups, sprint reviews, and cross-functional agile planning sessions.
- ❖ Documented system flows and user manuals, supporting knowledge transfer for future development teams.

Projects

- ❖ **E-Commerce Platform:** Built a full-stack e-commerce platform with Java Spring Boot backend, React frontend, AWS deployment, and MongoDB/SQL databases.
- ❖ **Real-Time Analytics Dashboard:** Designed a real-time analytics dashboard using React, WebSockets, Kafka, and GCP BigQuery for large-scale data visualization.
- ❖ **Cloud-Native Microservices:** Migrated legacy monolith into Docker-based microservices with Kubernetes orchestration on AWS, improving resilience and scalability.

Certifications

- ❖ **AWS Certified Solutions Architect – Associate**
- ❖ **Google Cloud Professional Cloud Developer**
- ❖ **Oracle Certified Professional, Java SE Programmer**
- ❖ **Docker Certified Associate**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
