Professional Summary

Full-stack engineer with extensive expertise in building scalable applications using **Vue.js, Node.js, and cloud-native microservices**. Skilled in architecting solutions across **AWS, GCP, Docker, SQL, and NoSQL databases**, ensuring high performance, reliability, and security. Adept at leading cross-functional teams, optimizing CI/CD pipelines, and driving delivery of enterprise-grade applications with strong focus on scalability and maintainability.

Technical Skills

- ❖ **Frontend:** Vue.js, Nuxt.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS
- ❖ **Backend:** Node.js, Express.js, RESTful APIs, GraphQL, Microservices
- ❖ **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions)
- ❖ **Databases:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB, Redis, DynamoDB)

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Engineered full-stack solutions with **Vue.js and Node.js**, integrating real-time APIs and cloud services, ensuring scalability across AWS and GCP platforms.
- ❖ Designed and deployed **containerized microservices with Docker and Kubernetes**, streamlining deployments and reducing environment inconsistencies.
- ❖ Built **data-intensive applications using SQL and NoSQL**, optimizing queries and indexes for performance across PostgreSQL and MongoDB clusters.
- ❖ Led cross-functional teams in Agile sprints, enforcing coding standards, test coverage, and DevOps best practices to enhance reliability and collaboration.
- ❖ Spearheaded **CI/CD automation pipelines** using Jenkins and GitHub Actions, significantly reducing release cycles while ensuring security compliance.
- ❖ Integrated **third-party APIs and GraphQL endpoints**, maintaining resilience through proper error handling and retry strategies in distributed systems.
- ❖ Conducted **cloud cost optimization** by analyzing AWS usage, leveraging reserved instances and auto-scaling groups, improving efficiency in production.
- ❖ Mentored junior developers, providing technical reviews and knowledge-sharing sessions on **Vue.js, Node.js, Docker, and database performance tuning**.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Developed **end-to-end web applications** using Vue.js for frontend and Node.js for backend, ensuring responsiveness, accessibility, and cross-browser compatibility.
- ❖ Implemented **REST APIs and GraphQL services** in Node.js, integrating with external data providers and enhancing interoperability with partner systems.
- ❖ Leveraged **Docker and Kubernetes** to deploy microservices across hybrid cloud infrastructure, ensuring high availability and automated scaling.
- ❖ Optimized **SQL and NoSQL databases**, introducing caching with Redis to accelerate performance while reducing load on transactional systems.
- ❖ Designed **cloud-native applications** across AWS and GCP, using S3, Lambda, Pub/Sub, and Firestore for secure and scalable business workflows.
- ❖ Collaborated with QA teams to design automated test strategies, reducing regressions and improving confidence in production deployments.
- ❖ Created **real-time dashboards** with WebSockets and event-driven microservices, enhancing data visibility for enterprise clients.
- ❖ Conducted **code reviews, refactoring, and performance audits**, ensuring maintainability and long-term scalability of core applications.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Built **modular Vue.js components** and **Node.js backend APIs**, standardizing coding practices and improving frontend-backend integration workflows.
- ❖ Designed and optimized **relational schemas in MySQL and PostgreSQL**, ensuring data integrity, scalability, and efficient query performance.
- ❖ Introduced **NoSQL solutions like MongoDB** for unstructured datasets, streamlining storage and retrieval for analytics pipelines.
- ❖ Implemented **containerized deployments with Docker**, ensuring consistency between development and production environments.
- ❖ Integrated **cloud services from AWS**, including S3 for asset management, EC2 for compute workloads, and RDS for relational database hosting.
- ❖ Enhanced **logging and monitoring pipelines** using ELK stack and Prometheus, improving incident response and proactive debugging.
- ❖ Automated deployment processes by setting up CI/CD pipelines with Jenkins, improving speed of delivery and reducing manual overhead.
- ❖ Contributed to **cross-team architectural discussions**, aligning on best practices for microservices, caching, and scalable application design.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Contributed to the development of internal tools with **Node.js services** and frontend prototypes using **Vue.js**, enhancing developer productivity.

- ❖ Assisted senior engineers in integrating SQL Server queries with enterprise apps, ensuring optimized execution and stable schema design.
- ❖ Explored **NoSQL adoption for semi-structured datasets**, supporting proof-of-concepts for distributed storage and retrieval systems.
- ❖ Automated build and deployment workflows with Docker, reducing integration issues across testing environments.
- ❖ Participated in Agile ceremonies and documented technical workflows to improve knowledge sharing across teams.
- ❖ Conducted **code reviews and debugging sessions**, ensuring best practices and high code quality standards.
- ❖ Delivered POCs leveraging AWS services, laying groundwork for enterprise adoption of cloud infrastructure.
- ❖ Supported data analysis tasks with SQL and Python, contributing to reporting automation initiatives.

Projects

- ❖ **E-Commerce Platform:** Built a full-stack online marketplace using Vue.js, Node.js, Docker, AWS, and MongoDB with secure payment integration.
- ❖ **Analytics Dashboard:** Developed real-time visualization system with Vue.js frontend and Node.js microservices, leveraging Redis and PostgreSQL.
- ❖ **Cloud Cost Optimizer:** Designed service on AWS and GCP to monitor cloud expenses and auto-apply optimization rules.
- ❖ **Collaboration Suite:** Created web app with real-time messaging and file sharing using WebSockets, Vue.js, Node.js, and Firebase.

Certifications

- ❖ **AWS Certified Solutions Architect – Associate**
- ❖ **Google Cloud Professional Cloud Developer**
- ❖ **Docker Certified Associate**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
