

TAYLOR PENTZ

Senior Software Engineer

taylorpentz2@gmail.com | 1601 Larkin, High Point, NC | +1 (980) 981-4522
<https://www.linkedin.com/in/taylor-pentz-10a92a3aa>

Professional Summary

Seasoned Full Stack Engineer with 8+ years of experience building scalable web applications using modern front-end and back-end technologies. Specialized in Angular, PHP (Laravel), RESTful APIs, MySQL, Docker, and cloud platforms including AWS and GCP. Adept at leading development lifecycles, integrating secure and maintainable code, and collaborating cross-functionally in agile and hybrid environments. Passionate about delivering intuitive, high-performing user experiences and architecting resilient backend systems.

Technical Skills

- ❖ Angular (v12+), TypeScript, JavaScript (ES6+)
- ❖ PHP (Laravel, Symfony), RESTful APIs
- ❖ MySQL, PostgreSQL, MongoDB, DynamoDB
- ❖ Docker, Kubernetes, CI/CD (GitHub Actions, GitLab CI)
- ❖ AWS (EC2, S3, RDS, Lambda), Google Cloud Platform (GCP)
- ❖ Git, GitHub, Bitbucket, Agile & Scrum
- ❖ Cloud Functions, Serverless, API Gateway, NoSQL

Professional Experience

SumatoSoft

Senior Software Engineer

Boston, MA (Remote) | Apr 2023 – Mar 2025

- Led development of a microservice architecture using Laravel and Angular to modernize a legacy monolith app, improving system responsiveness and deployment time by over 45%.
- Designed and implemented RESTful APIs used across 10+ modules and integrated them with third-party platforms, reducing redundancy and client-side logic.
- Built reusable Angular components and modular services to accelerate UI delivery and ensure consistent design patterns across web applications.
- Migrated on-prem applications to AWS with Docker containers and ECS, decreasing infrastructure cost by 30% while improving uptime.
- Optimized MySQL queries and schema design to handle data-intensive operations for enterprise clients, improving dashboard load time by 70%.
- Collaborated closely with QA, product managers, and designers in a hybrid agile workflow, refining sprints and improving delivery velocity.
- Integrated CI/CD pipelines with GitHub Actions and Docker for automated testing and deployments across staging and production environments.
- Implemented security best practices across backend and frontend code, conducting code reviews and vulnerability audits regularly.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- Developed enterprise-grade applications using PHP Laravel for backend and Angular for frontend, serving fintech clients and handling millions in transactional data.
- Built a real-time wealth management dashboard using REST APIs and MySQL, delivering 98% accuracy in financial reporting and analysis.
- Created Angular forms and dynamic UIs for client onboarding workflows, reducing onboarding time by 60% and improving user experience scores.
- Designed and containerized services using Docker to streamline development and testing environments, ensuring consistent builds across teams.
- Built and documented internal RESTful services libraries to streamline API development and consumption across 12+ projects.
- Integrated AWS S3 for secure document storage and RDS for scalable relational data storage in production environments.
- Participated in daily agile ceremonies, provided effort estimates, and contributed to architectural decisions and sprint planning.
- Led migration of PHP 5.x legacy code to Laravel, applying SOLID principles and writing over 500 unit and integration tests.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- Developed and maintained CRM systems using PHP and jQuery, later refactoring to modern Angular frontend for performance gains.
- Implemented feature-rich user dashboards and data visualization tools in Angular, enabling real-time decision-making for business clients.
- Designed and optimized MySQL schemas, indexes, and stored procedures to handle over 20,000 active users across multiple tenants.
- Contributed to REST API design used by mobile and web platforms, increasing interoperability and reducing code duplication.
- Introduced Docker to the dev team and created local dev environments, cutting onboarding time for new hires by 40%.
- Collaborated with QA to set up automated test scripts and end-to-end testing using Cypress and PHPUnit.
- Delivered code reviews and pair programming sessions to support junior developers and ensure coding standards.
- Worked closely with UI/UX team to refine usability across responsive web applications, improving bounce rate by 25%.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- Built internal tools using PHP and AngularJS to support engineering documentation and reduce manual processes for R&D teams.
- Integrated MySQL reporting and visualization modules that enhanced team analytics and planning capability.
- Developed a task-tracking app used across departments, reducing backlog management overhead by 30%.
- Applied MVC principles in developing clean, testable backend code that was later reused in production-level applications.
- Coordinated with senior engineers to deploy Dockerized environments for various micro-apps.
- Participated in daily stand-ups and sprint reviews, gaining agile experience in real-world software cycles.
- Documented best practices and user manuals for internal libraries and toolkits for knowledge sharing.
- Received full-time return offer based on strong performance and initiative shown during cross-functional projects.

Projects

Smart Inventory Tracking Platform

- Built Angular frontend and Laravel backend for a warehouse system managing 50K+ SKUs across 3 continents with real-time analytics.
- Integrated AWS S3 for media uploads and GCP Pub/Sub for async updates to third-party vendors and internal dashboards.

Event-Driven Wealth Management System (Hexaview)

- Engineered a Kafka-backed backend pipeline for real-time alerts, processing 5M+ daily events, supporting proactive wealth advisory workflows.

Certifications

- AWS Certified Developer – Associate
- Google Cloud Associate Cloud Engineer
- Laravel Certified Developer
- Docker & Kubernetes for Developers (Udemy)
- Modern Angular Architectures (Pluralsight)

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
