Professional Summary

Full-stack software engineer with expertise in **Python, Vue.js, AWS, GCP, Docker, SQL, and NoSQL**. Proven track record of building scalable applications, modernizing legacy systems, and delivering high-impact features across distributed environments. Adept at leading teams, architecting cloud solutions, and optimizing data workflows for performance, scalability, and reliability.

Technical Skills

- ❖ **Backend:** Python (Django, Flask, FastAPI), REST/GraphQL APIs
- ❖ **Frontend:** Vue.js, Vuex, Nuxt.js, TypeScript, HTML5/CSS3
- ❖ **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, CI/CD pipelines
- ❖ **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Cassandra (SQL + NoSQL)

Professional Experience

SumatoSoft

Senior Software Engineer
Boston, MA (Remote) | Apr 2023 – Mar 2025

- ❖ Designed and implemented full-stack applications using **Python backends with Vue.js frontends**, integrating APIs, authentication, and real-time updates across distributed services.
- ❖ Built **cloud-native deployments** using AWS ECS, Docker, and Kubernetes, optimizing scalability, reducing operational complexity, and increasing reliability across multi-tenant apps.
- ❖ Architected **data workflows leveraging PostgreSQL for transactional data and MongoDB for unstructured content**, ensuring performance through indexing and optimized queries.
- ❖ Enhanced developer productivity by introducing **CI/CD pipelines with GitHub Actions and Terraform**, standardizing build, test, and deployment across multiple environments.
- ❖ Partnered with product managers and designers to deliver user-centric interfaces, **translating complex business needs into intuitive Vue.js components with Vuex state management**.
- ❖ Conducted **code reviews, mentoring junior engineers**, and implementing coding best practices that improved maintainability and lowered onboarding time for new hires.
- ❖ Improved **security posture** by implementing OAuth2.0 authentication, JWT handling, and role-based access controls across microservices, aligning with compliance standards.
- ❖ Reduced downtime and improved observability by integrating **monitoring with Prometheus and Grafana**, ensuring near-real-time alerting and performance visibility.

Hexaview Technologies Inc.

Software Engineer

New York, NY | Jul 2018 – Mar 2023

- ❖ Developed and deployed **enterprise web applications** using Python Flask APIs with Vue.js frontends, ensuring high availability, performance, and user-friendly interfaces.
- ❖ Migrated multiple monolithic services into **containerized microservices with Docker**, improving fault tolerance, reducing deployment times, and enhancing modularity.
- ❖ Designed **relational database schemas in PostgreSQL and optimized MongoDB NoSQL collections**, delivering faster queries for analytics-heavy modules.
- ❖ Implemented **caching strategies with Redis** to reduce API response latency and improve user experience across high-traffic workloads.
- ❖ Collaborated with QA and DevOps teams to implement **automated testing, CI/CD, and performance benchmarking pipelines**, ensuring stable production releases.
- ❖ Enhanced system security by **applying encryption, secure APIs, and compliance with GDPR and SOC2 standards**, protecting sensitive client data.
- ❖ Built **data visualization dashboards in Vue.js** integrated with APIs, empowering end-users with real-time insights and decision-support tools.
- ❖ Drove **cross-functional collaboration with global teams**, improving delivery timelines and ensuring alignment between technical goals and business outcomes.

SimbirSoft Company

Software Developer

Boston, MA | Mar 2015 – Jun 2018

- ❖ Built full-stack solutions with **Python Django backends and Vue.js user interfaces**, enabling clients to scale operations while ensuring code reusability and maintainability.
- ❖ Designed **scalable REST APIs** consumed by frontend and third-party integrations, providing consistent performance under heavy load.
- ❖ Deployed **applications across AWS and GCP** using Dockerized containers, ensuring fault-tolerant infrastructure with multi-region failover strategies.
- ❖ Implemented **SQL and NoSQL hybrid database models** to support transactional, analytical, and semi-structured workloads with seamless integration.
- ❖ Enhanced user engagement by creating **responsive, mobile-friendly Vue.js components**, aligned with accessibility standards and best UI/UX practices.
- ❖ Created robust **unit and integration tests**, improving coverage and reducing regression issues during production releases.
- ❖ Established **API documentation and developer guides**, facilitating smoother onboarding and third-party integrations.
- ❖ Optimized performance of legacy systems through **refactoring and database indexing**, reducing response times and resource overhead.

Microsoft

Software Developer Intern

Cambridge, MA | Aug 2014 – Feb 2015

- ❖ Assisted in the **development of internal tools** with Python scripts and SQL databases, streamlining workflows and reducing manual operations for engineering teams.

- ❖ Built **REST APIs** for data retrieval and reporting, improving transparency and reducing reporting overhead for product managers.
- ❖ Implemented **Docker containerization** for local development environments, improving consistency and reducing setup time for new developers.
- ❖ Supported integration of **Azure cloud services** for analytics pipelines, learning best practices in cloud deployments and monitoring.
- ❖ Collaborated with cross-team engineers, documenting technical findings and presenting enhancements for usability and efficiency.
- ❖ Participated in **code reviews and debugging sessions**, developing professional skills in enterprise engineering practices.
- ❖ Conducted testing and validation of system modules, ensuring reliability and performance alignment with internal standards.
- ❖ Delivered technical reports summarizing achievements, learnings, and recommendations for team adoption.

Projects

- ❖ **E-Commerce Platform:** Built a full-stack online marketplace with **Python FastAPI backend, Vue.js frontend, PostgreSQL, and Dockerized AWS deployment.**
- ❖ **Data Analytics Dashboard:** Created real-time dashboards using **Vue.js + Python Flask APIs**, integrating MongoDB for dynamic insights.
- ❖ **Chat Application:** Developed scalable chat app with **WebSockets in Python + Vue.js**, deployed on GCP Kubernetes clusters.
- ❖ **CI/CD Automation:** Implemented GitHub Actions pipelines with **Docker, AWS ECS, and Terraform**, enabling zero-downtime deployments.

Certifications

- ❖ **AWS Certified Solutions Architect – Associate**
- ❖ **Google Cloud Professional Cloud Developer**
- ❖ **Docker Certified Associate**
- ❖ **MongoDB Certified Developer Associate**

Education

University of North Carolina at Chapel Hill

Bachelor's Degree in Computer Science (2010 – 2014)
